## **Health and Welfare**

-19

In this town we work for solidarity among the related fields of health, medicine, and education to make a more healthy and comfortable community. The city and the people are working together to develop comprehensive health policies to cover each stage of life.

We have created a complete health and welfare complex by placing a general health center, a senior citizens center, and a clinic all in close proximity to each other to specifically meet the needs of women and senior citizens and make their life just a little easier. We are striving to establish Ogoe as a town committed to the well being of its citizens. Besides expanding the physical facilities we are also endeavoring to enhance the care of the heart.
